

A PARADISE OF COLOR, FRESHNESS AND AROMA

Covering a mere 0.03% of the global territory, Costa Rica is home to close to 5% of the world's biodiversity including, plants, flowers and foliage that personify the very essence of a country renowned for its color, aroma and diversity.

Characteristics

Costa Rica offers over 200 varieties of plants including dracaenas, ficus, crotons and bromeliads. The amount of land dedicated to the production of this type of product reaches 1,236 hectares.

Approximately 376 hectares of the Costa Rican countryside bursts with color when harvesting the more than 1,200 varieties of orchids, foliage and other flowers, including Petunias, Musas, Iris, Birds of Paradise, Lilies and Aralias.

Benefits

Ornamental plants can help remove indoor chemical pollutants, such as acetone, benzene, xylene, ammonia, trichlorethylene, and formaldehyde.

The presence of plants in the workplace helps reduce stress and anxiety levels

Houseplants help keep ventilation systems clean and free of harmful substances.
